

SNOW GLOBE ADDITION MATS

N1.9 – I can show adding to 20 using objects, pictures, and symbols.

MATERIALS:

YOU WILL NEED:

- Snow Globe Addition Mat
- Dry Erase Markers
- Dry Erase Sleeve (optional)
- Dice
- Mini Snowflake Erasers (or other manipulative)

INSTRUCTIONS

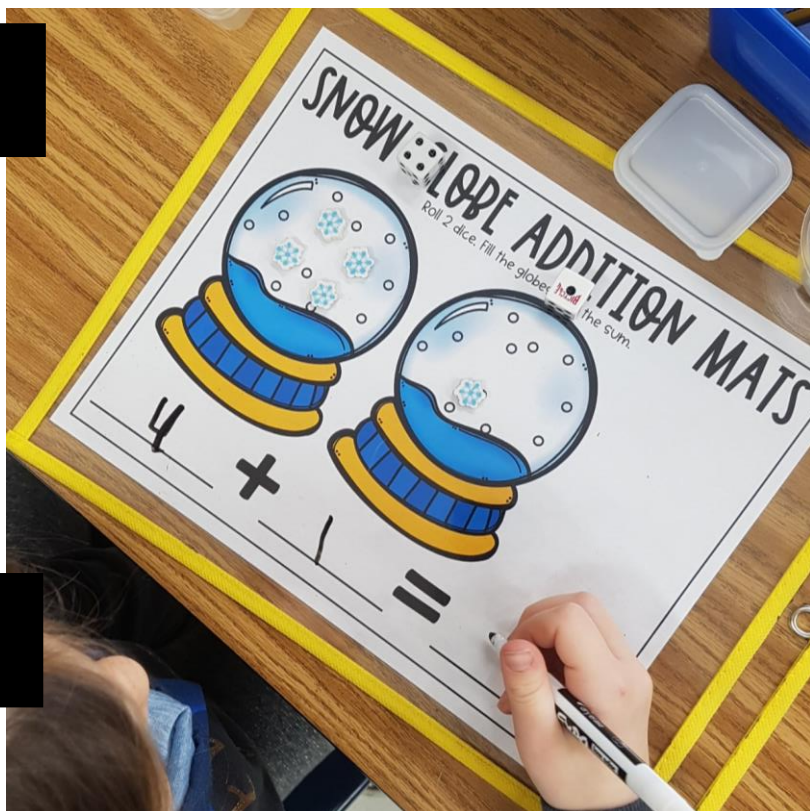

1. PRINT & LAMINATE MATS

Print the addition mats and laminate so they can be used with a dry erase marker. Alternatively, place the mats into a dry erase sleeve.

2. PLAY

Students roll two dice and record the numbers in the addition sentence using a dry erase marker. Students will then use mini erasers (or other manipulative) to fill each snow globe to find the sum. They will then record the sum in their addition sentence.

*This activity is a great option for using with **Rotational Math**. Students can work on this independently and can be set up as a “Hands On” rotation.

SNOW GLOBE ADDITION MATS

Roll 2 dice. Fill the globes. Find the sum.
